Summary

Detail-oriented Data Analytics Analyst experienced in engineering end-to-end ETL pipelines and developing cutting-edge visualizations. Highly proficient in Alteryx for complex data wrangling logics, alongside Tableau and Power BI for designing insightful, UI/UX-optimized dashboards. Strong foundation in Python, Advanced Excel, and statistical problem-solving, with a proven ability to work within Agile development frameworks to deliver high-quality data solutions.

Skills

Data Wrangling & ETL: Alteryx Designer, Data Cleansing, ETL Pipeline Development, Data Integrity
Data Visualization & UI/UX: Tableau, Power BI, Dashboard Design, KPI Scorecards, Visual UI/UX Best Practices
Analytics & Programming: Python (Pandas, NumPy), Advanced Excel (VLOOKUP, HLOOKUP, Macros), SQL, RDBMS
Methodologies & Business Acumen: Agile/SDLC, User Acceptance Testing (UAT), Statistical Analysis, Machine Learning Metrics, Problem Solving

Experience

Data Analyst Intern

Feb 2025 – May 2025

Ants Skill Varsity

Tableau, Power BI, SQL

- Analyzed complex datasets of 10,000+ records using SQL to extract actionable business insights and trends.
- Designed and developed interactive dashboards in Tableau and Power BI applying UI/UX best practices, reducing manual reporting time by 30%.
- Assisted in continuous improvement processes by maintaining internal project documentation and data quality standards.

Software Developer Intern (IoT)

Sept 2024 – Dec 2024

STPI IoT Open Lab

ESP32, Arduino, Java

- Optimized data communication pipelines for IoT solutions, reducing latency and ensuring 99% uptime for real-time monitoring.
- Leveraged strong problem-solving and troubleshooting skills to resolve backend bottlenecks under tight deadlines.

Projects

Global Supply Chain Data Pipeline & Analytics (Capstone) | *Alteryx, Python, Tableau, Excel*

2026

- Engineered an automated ETL workflow using **Alteryx** to ingest, cleanse, and join highly fragmented global sales datasets, executing advanced data wrangling logics.
- Conducted rigorous internal testing and User Acceptance Testing (UAT) using **Advanced Excel** (VLOOKUP, HLOOKUP) to validate data integrity against raw source files.
- Developed a dynamic **Tableau** dashboard adhering to strict UI/UX guidelines, utilizing **Python** to calculate and integrate baseline statistical forecasting metrics.

Esports Tournament Analytics Engine | *Power BI, Python, SQL*

2026

- Processed and analyzed large-scale match registration and performance datasets using **Python (Pandas)** to extract statistical trends.
- Designed interactive scorecards in **Power BI** to visualize player KPIs and competitive metrics, demonstrating the ability to independently manage the dashboard development process.

Certifications

- **IBM:** Predictive Analytics Modeler, Data Science & Python
- **NASSCOM:** Data Analytics Internship Certification

Education

B.E. Computer Science and Engineering

2025

T John Institute of Technology, Bengaluru

CGPA: 8.04/10
